

Mosaic Logo

After Effects cs6 template

Follow these steps to customize this template:

1. Import your logo into the project and place it in "01. YOUR LOGO HERE" composition
2. Import 25 images or photos in the project, they should be 640x640px, but you can also resize them after.
3. Open "02. YOUR PHOTOS or IMAGES HERE" folder and open "PHOTO 1" composition
4. remove the existing layer (your placeholder here.jpg) and place here your first image, scale it if it is more larger than 640x640px
5. Repeat this operation for all "photo" compositions
6. Open "03. FINAL COMPOSITION (to render)" comp and change the final text (yellow label), if you want to change its position use the position property of the "text position" layer
7. add this composition to the render queue
8. Launch the render

Enjoy it!!!
